In pursuance of Byelaws of NSE Clearing pertaining to Clearing and Settlement of deals, SEBI circular reference SMDRP/DC/CIR-8/01 dated June 21, 2001, Circular no. 53 (Download no. NCL/CMPT/61801) dated April 29, 2024 and Circular no. 10/2025 (Download no. 66244) dated January 22, 2025 members are hereby informed the procedure for adjustment of Futures and Options contracts in the underlying security INDRAPRASTHA GAS LIMITED, on account of Bonus Issue in the ratio of 1:1.

The 'adjustment factor' for the corporate action shall be 2 and the ex-date for the corporate action shall be January 31, 2025. The following action will be taken by NSE Clearing in this regard.

#### **1. Action by the NSE Clearing in respect of Futures Contracts:**

The positions in the contracts expiring on 30-JAN-2025 shall not be adjusted. All open positions in futures contracts with the underlying security as IGL existing after End of day on January 30, 2025, will be adjusted as under:

**Positions:** The adjusted positions shall be arrived at by multiplying the number of contracts in the pre adjusted position by the adjusted market lot. The adjusted market lot shall be as per Circular no. 10/2025 (Download no. 66244) dated January 22, 2025.

**Futures Price:** The adjusted futures price would be based on the Settlement price of the relevant futures contracts on January 30, 2025. Adjusted futures price shall be settlement price of relevant futures contracts on January 30, 2025, divided by 'adjustment factor'.

**Adjusted value:** In order to avoid difference arising due to rounding off of adjusted settlement price, the carry forward/adjusted value shall be computed by multiplying pre adjusted futures long/short quantity with pre adjusted settlement price. Accordingly, all positions in futures contracts with the underlying security as IGL would be marked-to-market on January 30, 2025, based on the daily

settlement price of the respective futures contract. Further, the adjusted positions would be carried forward at the adjusted value.

Begin-of-day margins on January 31, 2025, would be computed for the futures contract with underlying as IGL based on the adjusted carry forward value. Subsequently, intra-day margins would be computed based on the relevant traded prices at the time the intra-day span risk parameter files are generated.
