Key Points

- Existing MyNSE application has been upgraded with 2 Factor authentication features.
- Existing users of MyNSE will receive an email at their registered email address notifying them of the process to be followed.
- After the application is migrated on June 30, 2021, there will a forced password change and you will be required to undergo the “Password change” activity, before you can access your MyNSE Portfolio & Watch Application.

4. Existing Profiles and portfolios will continue to be available and there will be no changes in the same.
5. Accounts registered prior to 2010 and not activated by August 31, 2021 will be removed permanently.

We wish to remind our investors and clients that MyNSE application is a free tool and personalized Application that is provided by National Stock Exchange. Using this application, you set-up customize watches and view the prices of the stock's setup in the MY WATCH.

MyNSE is not a Trading Application. It does not allow you to buy or sell shares online. Investors are not required to deposit funds or link their bank accounts or any other details. MyNSE does not collect any personal information other than what is required to manage the account. NSE has not authorized any third party to open a MyNSE account on your behalf by demanding KYC documents.

To open a Trading Account, you need to approach an NSE registered broker and provide them with the KYC documents, as required. Please visit the Investors section for more details on Invest > "[How to open a trading account](#)"

If you are unable to access your MyNSE account please write to us at nsewebmaster@nse.co.in

Margin Calculator: The Equity Margin Calculator is a tool which allows you to input the symbols of stocks traded in CM market and get an indicative understanding of the margin requirements for each position. For the actual margin requirements – please get in touch with your registered broker/trader or access the latest circulars on Margins.

Stock Screener: NSE Stock Screener is a tool for investors who wish to screen stocks based on key fundamentals. This makes your investing a more process-driven approach, by offering metrics based on ownership, returns, growth, capital, quality, performance or valuation.

NSE Stock Screener provides you with basic data, metrics, or ratios that are important, necessary, relevant and useful in filtering stocks before you get to analysing individual companies.
